5.

6.

7. -> press "Close"

8. Restart

9. After the Restart, there is new "Putty" Icon on your Desktop, open it, it should look like this:

10. There is a new "WinScp" Icon on your Desktop, open it,
     it should look like this:

11. Remote Connect to Mouvent Machine

Once the "Service Technik Installer" is installed you might want to Test to connect from Remote to the Mouvent Machine.

For this purpose let's introduce a naming convention:

"PC" => Laptop, netbook, Tablet or whatever, but Windows 10 (Win7 might work as well, but it's not tested) should be installed.

"PClocal" = a PC physically connected to your Mouvent Machine over an Ethernet Cable

"Pcremote" = remote PC (not physically connected to the Mouvent Machine over an Ethernet Cable)

Both PC's have to be connected to the Internet. The easiest way might be over WLAN/WIFI/Mobile Phone Hotspot.

11.1.   First of all, make sure on both PC's the "Mouvent Service Technik Installer" is installed
11.2.   Pclocal: start TeamViewer

11.3.   Pcremote: start TeamViewer, connect to Pclocal

11.4.   Pclocal(via TeamViewer): set a fixed ip in the range 192.168.200.xxx for your ethernet adapter

11.5.   Pclocal(via TeamViewer): open cmd, ping one Electronic Board in your machine (for example: "ping 192.168.200.4")

11.6.   Pcremote: open teamviewer vpn

11.7.   Test ping

11.8.   Pclocal(via teamviewer): open rx_net_bridge (shortcut on the Pclocal desktop)
11.9.   Pcremote: open rx_route as Admin (located in C:\Program Files (x86)\Mouvent\rx_route.exe)
=> this only open shortly a cmd windows, which then is closed immediately

11.10.   Pcremote: open cmd, ping one Electronic Board in your machine (for example: "ping 192.168.200.4")

Now you can connect to your Mouvent Machine from your Remote PC via TeamViewer.

12.   Notes for Mouvent Employees:

As we selected "Company / Commercial use" on the TeamViewer installation
you will need sooner or later a valid TeamViewer Licence.
For Mouvent Employees we do have TeamViewer Licences available. To get a
Licence send an email to David Jauslin, Head of Customer Service
david.jauslin@mouvent.com

Revision History:

Rev.	Author	Date	Description
1.0	Stefan Weber	17.12.18	Tool v1.0
1.1	Stefan Weber	16.01.19	Tool v1.0 added Note about how to connect to Mouvent Machine from a Remote PC over TeamViewer
